

Question: give me steps in multiplication of 232432 with 2312121

Let's calculate the product of 232,432 and 2,312,121 step-by-step:

To multiply two large numbers, we can use the standard long multiplication method by breaking down the multiplier (2,312,121) and multiplying 232,432 by each digit based on its place value.

$$232,432 \times 2,312,121$$

Step 1: Multiply by the individual digits of 2,312,121

$$232,432 \times 1 = 232,432$$

$$232,432 \times 20 = 4,648,640$$

$$232,432 \times 100 = 23,243,200$$

$$232,432 \times 2,000 = 464,864,000$$

$$232,432 \times 10,000 = 2,324,320,000$$

$$232,432 \times 300,000 = 69,729,600,000$$

$$232,432 \times 2,000,000 = 464,864,000,000$$

Step 2: Sum all the partial products

$$232,432 + 4,648,640 + 23,243,200 + 464,864,000 + 2,324,320,000 + 69,729,600,000 + 464,864,000,000$$

Adding these step-by-step:

$$232,432 + 4,648,640 = 4,881,072$$

$$4,881,072 + 23,243,200 = 28,124,272$$

$$28,124,272 + 464,864,000 = 492,988,272$$

$$492,988,272 + 2,324,320,000 = 2,817,308,272$$

$$2,817,308,272 + 69,729,600,000 = 72,546,908,272$$

$$72,546,908,272 + 464,864,000,000 = 537,410,908,272$$

Final answer:

$$537,410,908,272$$
